About Us:

Located in Saint Paul, MN Website Wizards has been offering quality, low-cost web design services since 2004. We specialize in keeping our projects on time and within budget without hidden fees or other unethical practices. We have developed our client base from good reviews and word of mouth and by offering quality services to our clients.

We offer risk-free, no-money-down website design services to establish a healthy and trusting business relationship without clients and every project is treated uniquely with 1-on-1 interaction between designer and client. We thrive on client referrals and keeping a clean reputation by offering only the highest quality website designs proven to be both SEO friendly and customized to the client's individual needs.

Our industry-leading hosting solutions are provided by state-of-the-art servers on a redundant network with current software and security measures backed by a 99.9% uptime guarantee. Unlike our competition, we do not host you as a subdomain on our website but provide you with complete hosting access, username, and password to adjust your hosting as needed. This leaves 100% control of your website to you. With many of our competition, the control is left with them.

Give us a call with your next web-related project from website design, SEO, digital marketing, ad design, and social media management, we have you covered.

Website Design

Quality Matters

There are many overseas companies offering $200.00 to good-to-be true website design services and most often these designs lack proper coding, improper menu setting, and poor-quality design, graphics, and webpage flow. These things all contribute to the site's SEO score in a huge way and can cause your website to rank very low with search engines if they rank at all. If you plan to invest in a website, business, or web store, be sure that investment counts.

On the next few pages, you will see some of our website designs, judge the quality, time invested, and visual appeal of them for yourself. Although we can not offer to beat those companies offering $200.00 low budget, low-quality designs, we can beat them with high-grade web designs built to be both SEO friendly and visitor appealing all at a very affordable rate.

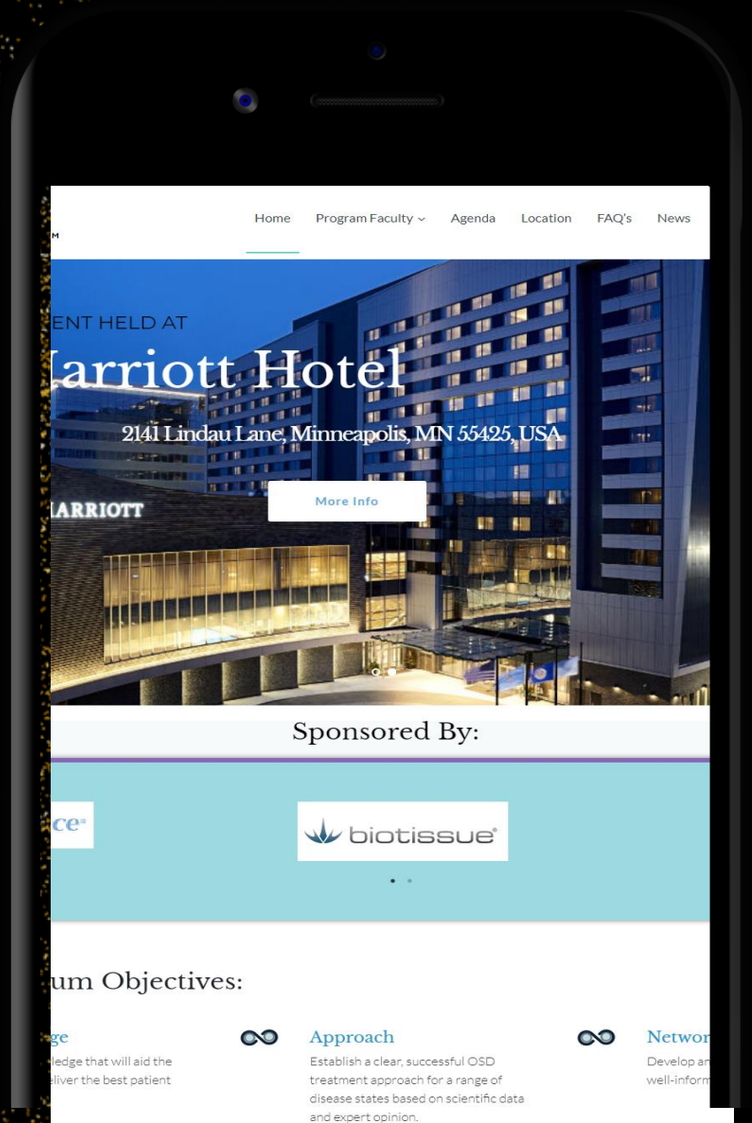
63% of our website design work falls well below $1000.00 beating industry standards in price, design, and quality. Review the following pages and decide for yourself.

Website Design

Golden Rules

Mobile Responsive Designs

All Website Wizards designs are coded to work and look stunning on all the latest devices from phone to desktop and everything in between.



View Our Work

Client asked for a simple to use website for upcoming event which would highlight speakers and event agenda.

Created a design that included stunning visual animation, eye-appealing design and integrated data gathering forms and payment gateway.

Cross linking for room bookings and user-friendly menus. Setup doctor overview and single view profiles for added ease of use.

Platform: WordPress

Time To Complete: 1 Week

Client asked for a website that would showcase his exceptional craftsmen abilities and asked what we could provide.

We setup a design that focuses around high quality pictures of his work and designed a easy to navigate website around it.

Animation, forms and scrolling real-time reviews were all embedded into the website for added visitor conversion.

Time To Complete: 1 Week

SEO Services

Learn More

Our website SEO services employ strictly ethical solutions. We do not offer bulk or mass back linking as this is proven to have negative effects on your search engine score as will bot related blog and article submissions.

All our on-page and off-page solutions are handled by professionals who personally created and submit each project from IP addresses that are not flagged as bot or spam related. This is highly important if you want your hard earned money to go toward improving your websites SEO stance vs simply throwing it away.

Each SEO project we undertake is uniquely developed for that specific project. Unlike others, we do not use template articles by injecting your name, website and information into it but instead custom write each article from scratch. This also is important because search engines are able to detect slightly modified or copied text from site to site. If its not 100% unique then its not counting toward improving your website.

SEO Basics - Included in each design

With most of the low budget websites we have seen there is a common problem. Lack of SEO enhanced design. They rarely if ever put the time into assigning ATL tags to your images, using proper formatting of title and heading tags, keyword embedding or many other practices that should be used from the start.

With our design service we ensure 100% of your images are properly tagged, that title and heading tags are not only used but used in a proper way with keyword embedding, we ensure the website will adjust for smaller devices like phones and tablets. We ensure there are no missing or broken linking and make use of proper header and footer areas.

Advertising Design

Digital & Print

Although not our primary focus in the industry, we do offer advertisement design services for both digital and in print use. We use industry standard software such as Photoshop which is what was used to create many of the images and effects within this portfolio. Clients receive their completed work in the format of their choice along with a copy of the native files.

Hosting & Domain Names

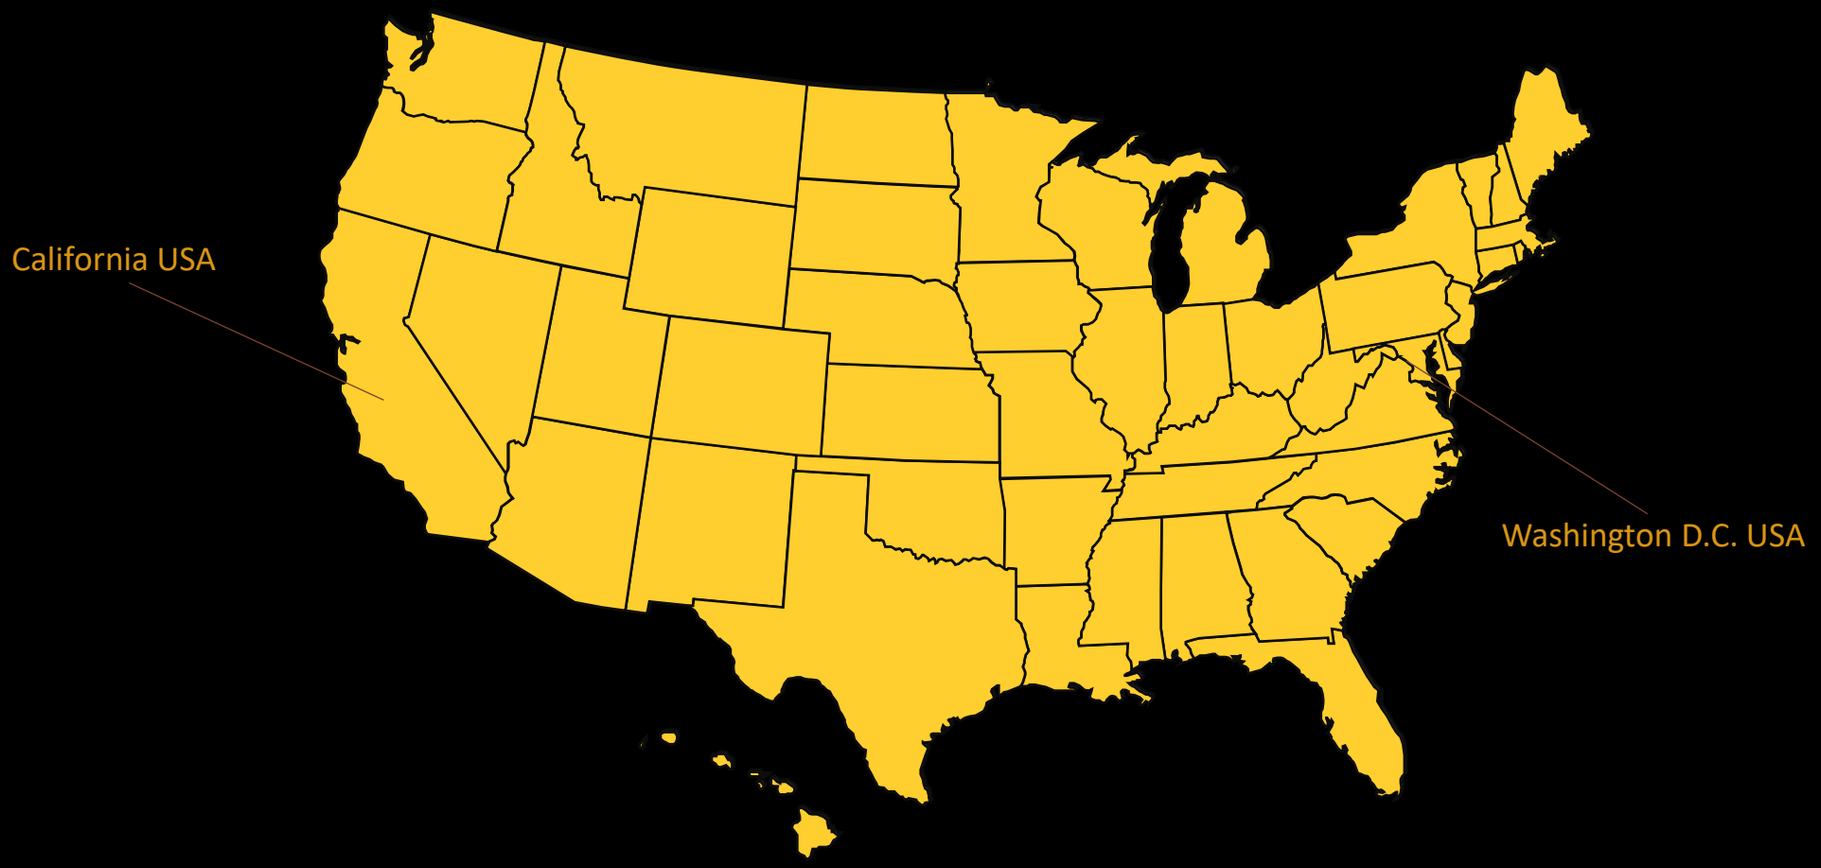
Support Simplified

The benefit to having your website, hosting and design work all supported by the same company is being able to contact one number for all your web related support. With our hosting services we provide free email and phone support for any questions or problems regarding your website, hosting, email or other related issues. One point of contact for immediate assistance means less time spent trying to figure out which company to call for a problem when each service is managed independently.

Data Centers

One benefit to hosting with us verses other companies is our hosting data centers are located within the United States offering faster connection times for visitors to your website who are within North America.

Fast response times is one measurement used by search engines when determining your overall SEO score.



Our Hosting Includes

SSD Hard Drives

We use the industries fastest hard drives delivering the fastest reads and writes to your website.

RAID Array

Your website data is stored in a RAID array ensuring extra redundant failsafe's and reliability.

Off-Site Backup

We offer off-site backups of your website in case of disaster and data center rollover protection.

Low Pricing

Our premium support plans start as low as $14/month.

Unlimited

Unlimited bandwidth, storage, email accounts and sub-domains.

High Performance

Our network and servers are high end, performance built and triple redundant. 99.9% uptime guarantee.

Website Wizards golden rules to web development are in place to ensure your money is well spent and the website remains a quality work of art for years to come.

KEEP CALM *and* STAY GOLDEN

Are You Here?

Completely clueless when it comes to starting a website and what will be needed?

Not a problem, the majority of our client base comes from customers who are entering the realm of website ownership for the first time. We are happy to walk you through each step along the way.

Give us a call, we can help.

Thank You!

Thank you for taking the time to review our portfolio.
